COLEMAN COUNCIL ELECTION ON OCTOBER 18th

Coleman town council met Tuesday evening, September 5th, when Town Secretary T. A. Collister was appointed as returning officer for forthcoming elections to be held in Coleman on October 18th. There will be two vacancies on council as the terms of A. Delucca and J. Wavrecan expire. Nominations day has been set for September 27th.

The agreement with the Provincial Government regarding the laying of cement sidewalks in Coleman was duly signed and has been returned to Edmonton. Tenders are to be considered on Monday, September 11th, so that immediate construction on the new sidewalks can commence. The new walks are being built under the Provincial Government's five year plan.

A new, colorful sign is to be built and erected at the entrance to Coleman at the Kananaskis Highway. If the sign meets with council's favor two other signs will be built for erection at both the east and west entrances of the town.

The signs will bear such lettering as "Entering Coleman, The Friendly Town".

Popular Couple Honored On 50th Anniversary

Mr. and Mrs. David Hoyle of Calgary recently celebrated their golden wedding anniversary when the family met at the St. Barnabas Church hall in Pincher Creek.

Following a family dinner with places laid for 30, members of the family held open house for them. Of their eight sons and daughters, six were able to be present with their families. These included Mr. and Mrs. Gilbert Hoyle and Marilyn, Calgary; Mr. and Mrs. Leslie Barrons and family, Milk River; Mr. and Mrs. Leonard Hoyle and Darrell, Edmonton; Mr. and Mrs. Kenneth Rhodes and family, Edmonton; Mr. and Mrs. Roy Blener-Hassett and family, Pincher Creek; and Mr. and Mrs. Veno Pozzi and family, Hillcrest.

Unable to be present were their son Wilfred of Ottawa, Ont., and their daughter, Mary (Mrs. Claude Parsons) of Paris, France.

During the family dinner Mr. Gilbert Hoyle was master of ceremonies and proposed the toast to his parents, the bridal couple of 50 years ago.

Mr. Leslie Barrons asked the blessing. Congratulatory messages were read from Governor-General Percy Page; Premier Manning and Prime Minister Diefenbaker, as well as from several friends and relatives.

Following the dinner a program of piano solos, recitation and songs was presented by the grandchildren.

Mr. and Mrs. Hoyle were married August 7, 1911, in St. Paul's Anglican Church, Astley Bridge, Bolton, Lancashire, England, and came to Canada in 1914.

Mr. Hoyle was principal of the Coleman School for over 20 years until his retirement in 1949.

Large Enrollment At School

Coleman school term began last week and enrollment figures show the school population to have increased considerably.

The school population in June showed a figure of 621 students, while the present enrollment figure shows 601, an increase of 40 students. Beginners at school in grade 1 number 83 against last year's 68 pupils.

Meanwhile a great deal of work has been done in the Coleman schools during the summer months as many rooms have been repainted, linoleum laid and the auditorium has been divided in half to make two more rooms for the students.

United Church News

The Wide World Day of Communion will be observed the first Sunday in October—October 1st, in St. Paul's United Church.

A welcome is extended to all.

Forestry Planning New Road

The Forestry personnel are this month building a gate across the Lyons Creek Road proceeding from Blairmore south to the Goat and Lynx Creek areas.

Forestry officials have advised that the purpose of the gate will be to provide more facilities for registrations when entering the Crows Nest Forestry Reserve.

When the gate is completed registration boxes will be set up where persons entering the reserve can get their travel permits and fill out rifle registrations.

General information regarding travel routes in the reserve as well as fire conditions and road closure information will be posted as required. The new gate is one of several that are being built at various points in the forest reserves. The Lyons Creek road, built and maintained by Blairmore Sawmills is a logging road under licence of occupation by Blairmore Sawmills and although open to the public, persons using the road are requested to use caution as heavily loaded timber trucks use the road.

The road, bordered on both sides by heavy timber areas provides a fire hazard and travellers on the road are urged to use extreme care with cigarettes and any flammable materials.

According to Forestry officials it is proposed that the Lyons Creek road be extended next year so that it will connect with the Carbondale Road which will provide for an excellent circular tour of the Crows Nest area south of the Pass district.

NO HAPPY MEDIUM

A continental pianist was engaged as accompanist to an amateur whose voice was always out of tune. At last the time came when the maestro threw up his hands—"Madam," he said, "I giff u der chob. I play der black notes, I play der white notes—und always you sing in der cracks."

Task of signing his name to each of almost 10,000 certificates of the \$15,000,000 debenture issue of the Alberta Government Telephones Commission is faced by the Hon. Raymond Reiersen, Minister of Telephones and Labour. The issue,

which was sold with purchase priority to Albertans through the Alberta Treasury Branches, banks and investment houses, was in two divisions, \$3,000,000 in five year debentures and \$12,000,000 in long term issue.

All but approximately \$3,000,000 of the issue was purchased by Albertans exercising the opportunity given them under arrangements for sale. Funds will be used for Capital expansion in the AGT's \$200,000,000 communications network.

OF MANY THINGS

(By Ambrose Hills)

WINNIPEG'S METRO GOVERNMENT

Winnipeg is a big, sprawling metropolis, growing quickly and steadily. Because the plans of the various municipalities were sometimes in conflict, the Government of Manitoba set up a Metropolitan Corporation to take over those services in which co-ordination seemed most necessary.

While many citizens feared that another government on top of all the others, might mean just too much in the way of taxes, there was a general tendency to go along with the idea and give Metro a chance.

Today it is difficult not to take sides in the great debate about Metro. Many are up in arms against it, but it also has firm supporters who feel it has done fairly well and that mistakes were only to be expected.

The loudest complaint, and perhaps the most valid one, is that Metro has tried to go too far too fast. In any case, criticism has mounted over the past few weeks.

Oddly enough, the greatest criticism of Metro has arisen not from things which it has done but merely from things it is said to be planning.

First came the widespread rumor that Metro was going to ask for a tax of ten dollars on every automobile. Naturally those people who must drive a car, and who are already finding it hard to meet maintenance costs, looked on that tax as the straw that would break their back.

Then came the news that a Metro planning committee wanted to take down all the projecting signs on Winnipeg streets. This plan would hit almost every merchant in the Metro area, as well as the sign companies, their employees and suppliers. It might not bother the big department stores, which are easily found or identified, but it would be a terrific blow to the small side street establishments.

The sign industry complained that Metro wanted to make Winnipeg into a quiet town instead of busiest, brightest city of the great Midwest. Many Metro councillors declared that nothing had been done, that everybody was getting excited prematurely.

The fact is, however, that Metro, in the long run, may be destroyed not on the big important issues, or on what it actually does, but on the things it seems to threaten to do. Citizens will often face up to unpleasant facts. But they cannot stand endless uncertainty and rumors.

New "Fringe" Area TV Antenna May Improve Reception

Television views throughout all Canada who are plagued with poor TV reception because they live in fringe areas where signals are weak, now have hope for better entertainment to come.

Main reason for the breakthrough in reception is a successful research project which utilizes the principle of Proportional Energy Absorption to give clearer, stronger, all-channel reception and deliver pictures free of "snow", "flickering", "ghosts" and other difficulties associated with fringe

area reception.
The new antenna, called the Crossfire, has a design concept which permits the highly sensitive device to pull in desired signals with greater strength than ever before, while screening out unwanted transmissions.

The result is unprecedented picture power in areas where home television reception has been hampered by distance from the transmitter or local terrain problems.

Because of the new design concept, developed by Channel Master Corporation engineers, it is now possible for the first time to deliver the antenna's maximum signal strength on each channel on both high and low bands.

In conventional antenna, for example, signal strength diminishes as it travels the length of the antenna and successive elements are able to draw only decreasing amounts of the available electromagnetic energy transmitted by the TV station.

With the Crossfire, Proportional Energy Absorption is employed to increase signal gathering strength of the successive elements, each of which gathers a greater amount of the available energy to match the original signal taken in by the initial elements. Total picture power thus delivered to the set is substantially greater as a result.

The new antenna also has extremely high front-to-back ratio for what engineers call "clean" gain.

In other words, signal gathering strength is concentrated at the "front" of the antenna. The increased signal strength is not distracted by rear or side pickup, or electrical interferences.

A special transposed feed line gives the antenna the ability to reject unwanted transmissions.

Safe driving advice from A.C.I.F.

More traffic fatalities occur in summer than winter.

In July and August of last year there were almost three times as many traffic deaths as in January, according to the All Canada Insurance Federation.

Safety experts state that 99 per cent of all accidents are avoidable and only a very few are caused by bad roads, poor conditions or mechanical failures. The Federation, which represents more than 220 fire, automobile and casualty insurance companies, suggests the following tips from professional drivers:

- 1—When driving a strange car—or if someone has used your car recently—readjust the seat and rear view mirror.
- 2—A straight posture behind the wheel is safer and more efficient than slouching one.
- 3—Hands should grasp the rim of the steering wheel, not the spokes; most professional drivers suggest a fairly high position on the wheel.
- 4—Most restful position is with the upper arms vertical and the elbows fairly close to the body.
- 5—Driving should be done when you are relaxed and alert. Time of emotional stress or unusual tiredness are unsafe for driving.
- 6—Always start the car slowly; stop smoothly and slowly. Quick stops except in emergencies, are the mark of a careless driver.
- 7—Watch the car ahead of you, and the one ahead of that; check the rear view mirror frequently, especially when slowing or stopping.
- 8—On the open road, keep up with the traffic; don't fall behind or try to beat it.
- 9—On long trips, take frequent rests and don't over-eat; always keep at least one window partly open.
- 10—Always drive more slowly at night.

IN ORDER TO PUBLISH reports of meetings of various organizations, it would help if a press correspondent was appointed by each one to send in the news. It is impossible for a reporter to attend all the meetings, therefore co-operation would be appreciated, and at the same time publicity would be assured for the meetings.

Injuries Result In Accident West of Coleman

Mrs. Gertrude Buchwald of Regina, Sask., was taken to Crows Nest Pass Municipal Hospital Monday, September 4th to be treated for injuries she sustained in a car accident near the railway crossing at Sentinel, about four miles west of Coleman.

Mrs. Buchwald and her husband were proceeding east on the number three highway in their 1958 Oldsmobile car when the vehicle skidded on the highway and went out of control, rolling over in the ditch.

The car was completely demolished and Mrs. Buchwald sustained shoulder and internal injuries and shock. Mr. Buchwald was uninjured. The couple had driven from Fernie, B. C., where they had spent the night.

They were returning to their Regina home after having spent a vacation visiting in San Bernardino, Los Angeles, California.

RCMP Police of the Blairmore detachment are investigating. Mrs. Buchwald is still a patient in the Crows Nest Pass Municipal Hospital.

Remember when you used to go to bed with the curfew? Today they just blow it to wake you up.

In Memoriam

In Loving Memory of David Southworth, who passed away on September 17, 1960:

His smiling way and pleasant face

Are a pleasure to recall.

He had a kindly word for each,

And died beloved by all.

Some day we hope to meet him,

Some day, we know not when,

To clasp his hand in the better land

Never to part again.

Ever remembered by his daughter

and son-in-law, Mr. and Mrs.

Fred Hirst, also Joan, Steve and grandchildren.
